## Work Experience & Projects

### MYP Project

Photography showcase

### Volunteering

Tutoring

Reading to children

Preparing crafts

Shelving books

Co-counselor at a day camp

### Science Research

Impact of eutrophication on marine plants

Invasive species in the Long Island Sound

Effect of septic/sewage outfalls on aquatic environment

As a storyteller and an inquisitive mind, I embrace my curiosity and creativity both in art and science. I love science for the opportunities to ask and answer new questions, and art for its unique form of self expression. My dream in college and beyond is to work somewhere where I'm actively helping people and changing the world. Whether I accomplish this through my interest in animal science, architecture, or something else entirely, I'm thrilled to make a change and leave my mark.

## Hobbies

Crocheting Writing Photography Sewing

Reading Music Baking Digital/Fine Arts

## Extracurriculars

Tech Crew

Head of Lights/Lighting Designer/Light  
Board Operator/Spotlight Operator

2021-2025
